

TASMIHA HASSAN

Software Engineer

+1(289) 654-7499 | htasmiha@gmail.com | Vancouver, BC | [linkedin.com/in/thas](https://www.linkedin.com/in/thas) | tasmainian.github.io

PROFESSIONAL SUMMARY

Full-stack engineer with 5+ years of end-to-end ownership. Experience from product decisions to deployment and measuring impact. Built features used by millions, created data-driven dashboards to identify customer pain points, and shipped across React, TypeScript, C#, Java, Scala, and cloud-native services. Open to relocation to the United Kingdom.

WORK EXPERIENCE

MICROSOFT

Vancouver, BC

Software Engineer 2

Aug 2025 – Present

- Extended existing REST APIs to power the new Agentic Risk feature, enabling AI agent activity ingestion through new agent Azure Event Hubs, reusing existing service patterns to enable rapid scaling without rewriting core infrastructure
- Created KQL-powered adoption dashboards with funnel metrics and drill-down diagnostics, using weekly reviews to pinpoint customer drop-off points and drive iterative improvements to pipeline health and feature uptake
- Integrating 2 new agent tool signals into Agentic Risk, proactively expanding detection coverage to stay ahead of the evolving AI agent landscape

Software Engineer

June 2021 – July 2025

- Owned end-to-end Priority Content Only Scoring feature, implementing full-stack changes from React/JS UX to C#/.NET backend scoring across 4 independent services, reducing noisy alerts for enterprise customers by 15%
- Migrated alerts, insights and role-based access control to Microsoft Defender portal and built a CI/CD pipeline for UX deployment in Azure DevOps, achieving 44% product adoption and 33x exposure to new users
- Launched browser forensic evidence recording by analyzing cross-team ingestion pipelines and leveraging upstream user signals to trigger targeted URL-based application capture, expanding investigative coverage for enterprise organizations
- Directed cross-regional engineering efforts to implement GDPR, EUDB, and BCDR-compliant workflows, partnering with global teams to ensure consistent regulatory adherence across multiple geographies
- Migrated High Privilege Access authentication to modern token flows, enabling zero-trust compliance and reducing credential exposure across service-to-service dependencies

MCMASTER UNIVERSITY

Hamilton, ON

Program Support Assistant, Faculty of Engineering

Jan 2021 – Apr 2021

- Led development of an accessibility-focused mobile app using React Native and Firebase, improving daily task learning outcomes for users with cognitive disabilities based on supervised user testing feedback
- Presented to 100+ industry professionals and won 3rd place globally in the Digital Inclusion competition

EMBROSS (Airline Check-in Self Service Solution)

Richmond Hill, ON

Software Engineer Intern

May 2019 – Aug 2020

- Designed and implemented full-stack tooling for airline check-in systems, automating configuration and PDF workflows via ReactJS, NodeJS, ExpressJS, and SQL, saving engineering configuration time by 90%
- Improved production stability across 2 airline workflows by resolving 55+ defects and delivering on-time production patches in a Java Spring MVC application
- Traveled on a business trip to gather requirements directly from airline stakeholders, then led full-stack implementation of a frequent flyer loyalty program enabling kiosk check-in benefits for ~3 million passengers

TECHNICAL SKILLS

Languages: C#, Java, JavaScript, TypeScript, Python, C, KQL, Scala

Frameworks & Libraries: ReactJS, React Native, NodeJS, Express, Redux, .NET, Spring MVC

Cloud & Infrastructure: Azure (Event Hubs, Key Vault, Functions, App Service), CI/CD, Azure DevOps, Kusto/ADX

Tools & Practices: Git, GitHub, SVN, PowerShell, REST APIs, Automated Testing, Observability, Progressive Delivery

PATENTS

ARTIFICIAL INTELLIGENCE AGENT RISK ASSESSMENT AND MITIGATION [PENDING]

Co-inventor of a system for monitoring and detecting risky AI agent behaviors within enterprise environments, enabling real-time risk assessment and policy enforcement

EDUCATION

MCMASTER UNIVERSITY

Hamilton, ON

Bachelor of Engineering, Software Engineering

Sep 2016 – Apr 2021

Relevant Coursework: Large Systems Design, Data Structures and Algorithms, Software Testing, Databases, Machine Learning
